

ACTIVITIES

NATIONAL POLLUTION CONTROL

National Pollution Control Day aims to reduce pollution and raise awareness about how humans continue to misuse nature. Dr. K.K VYAS delivered a speech to raise awareness about pollution prevention. Students enthusiastically take part in the event. The event was successful due to the effective interaction between students and the resource person.

NATIONAL POPULATION DAY -2022

WORLD ENVIRONMENT DAY

The NSS team from Shekhawati Institute of Engineering and Technology conducted On June 4, 2019, Sikar Village held an awareness session for World Environment Day. This program involved 70 students from the civil, mechanical and computer department. The occasion was graced by our Dr. K. K Vyas, Ph.D. delivered an informative discussion on environmental issues such as cleaning, rainwater collecting, tree planting, and safety. Celebrating World Environment Day allows us to connect with nature.

The event coordinator made excellent arrangements and ensured that the program ran properly. World Environment Day is a global platform for promoting good environmental change and raising awareness about current environmental concerns. On this day, the local community works together to improve their lives. The annual "Beat Plastic Pollution" theme highlights the need for worldwide solutions to address this serious environmental issue.

WORLD ENVIRONMENT DAY

WORLD WATER DAY

World Water Day, celebrated annually on March 22, focuses on the importance of fresh water and advocates for the sustainable management of water resources. The 2023 observance brought together a diverse group of stakeholders, including government officials, environmentalists, academics, and community members, to highlight the critical issues surrounding water access and conservation. World Water Day 2023 successfully raised awareness about critical water issues and fostered a spirit of collaboration and innovation. The event highlighted the urgency of addressing global and local water challenges and showcased the collective efforts needed to ensure sustainable water management.

WORLD WATER DAY -2022

WORLD FOREST DAY

World Forest Day, observed annually on March 21, celebrates the vital role forests play in maintaining ecological balance, supporting biodiversity, and combating climate change. The 2024 event was organized to highlight the significance of forests, raise awareness about deforestation, and promote sustainable forest management practices. World Forest Day 2024 was a successful event that highlighted the critical importance of forests and fostered collaboration among various stakeholders. The event underscored the need for urgent action to address deforestation and promote sustainable forest management practices.
